PHASE 1

PPS for Ukraine

Paper Partition System

VAN+ Shigeru Ban Architects provide the Paper Partition System (PPS) for shelters of the increasing number of refugees staying in neighboring countries of Ukraine. This is a simple partition system to ensure privacy for inhabitants and has been used in numerous evacuation centers in regions hit by disasters, such as the Great East Japan Earthquake (2011), Kumamoto Earthquake (2016), Hokkaido Earthquake (2018), and torrential rain in southern Kyushu (2020).

GERMANY

Tegel airport - Berlin

On May 4, we made a demonstration of PPS to facility operators at Tegel Airport in Berlin, temporary using as a Ukrainian refugee facility. Compared with other partitions, PPS shows its advantage in terms of usefulness and cost. We keep discussing with facility operators to install PPS to the facility.

FRANCE

Installation in Paris was conducted by the staff of Shigeru Ban Architects Europe and the students from École nationale supérieure d'architecture de Versailles. 48 units were installed at Gymanse Marie Paradis in Paris 10th district and 28 units were installed at Gymnase Victor Young Perez in Paris 12th district.
