

Year: 2005

Location: United States

Program: Museum / Gallery

Brandeis university rose art museum

The design for the renovation and expansion of the Rose Art Museum strives to integrate the new and renovated programs economically, functionally, and aesthetically within its context. A Vierendeel truss supports the roof over the main exhibition space allowing for a flexible gallery as well as a large glass facade which connects the main exhibition space to the activity of the surrounding Brandeis University campus.
