PAPER GREEN HOUSE LES TONNELLES

Year: 2019  
Location: Japan  
Program: Retail and Commercial

Status: Completed  
Type: New-built  
Structure: Paper Tube Structure

This greenhouse is composed of arches made from paper tubes connected by metal joints. On the exterior, a ready-made greenhouse frame was installed with a double layer of fluorine film with an air layer in between to suppress the temperature changes of the interior. In summer, the leaves of the plants grown inside will cover the ceiling, blocking sunlight.
