

Centre d'interprétation du canal de BOURGOGNE – Institute

Year: 2005
Location: France
Program: Museum / Gallery

Status: Completed
Type: New-built
Structure: L-angle Structure

Conceptually parallel to the Furniture House, this gallery space contains a series of exhibition units that double as structure. Each unit is made of readily available perforated steel shelf angles, which are used throughout the building for a wide range of functions such as display units, storage cabinets, and wall partitions.
