

# Rietberg Museum Summer Pavilion

Year: 2013

Location: Switzerland

Program: Museum / Gallery

Status: Completed

Type: Temporary

Structure: Paper Tube Structure

The pavilion is used during the summer months for 3 months then put in storage for the remaining time so two different diameter of paper tubes were used so they can store within each other and minimize necessary storage space. In order to assemble without the use of heavy machinery, polycarbonate exterior panels, carbon-fiber trusses and tent roof was used.
