

Year: 2018

Location: Japan

Program:

# Yufu City Tourist Information Center YUFUINFO

The upper and lower floors are gently connected by a slope in a space containing aligned Y-shaped arch columns made of laminated timber. The first floor provides sightseeing information, with the railway view of the express train “Yufuin no Mori.” The slope, overlooking the beautiful mountain range, leads to the “Travel Library” on the second floor, which provides travel guides in a calm space. Outside is an observation deck, where nearby Mt. Yufu can be enjoyed.
