

Madrid Paper Pavilion

Year: 2013
Location: Spain
Program: Culture and Leisure

Status: Completed
Type: Temporary
Structure: Paper Tube Structure

The pavilion is composed of a L-shape existing concrete wall, 6 paper tubes columns and a paper tubes truss roof sitting on top. The paper tubes are made of recycled paper and manufactured locally in Pina de Ebro (Zaragoza, Spain). For educational purposes, architectural students participated in assembling the Paper tube trusses together with the contractor.
