

Year: 2008

Location: United Arab Emirate

Program: Gallery

Temporary Museum in UAE

The main issue for this park (Kalifa Park) was the dispersal of the existing facilities and open spaces, while their access through the excessive heat does not attribute in their interest. Rather than spotting new facilities scattered within the park, we proposed to gather and locate a facility along the main central axis providing the function of systematically connecting the existing open spaces and facilities. The new facility will be comprised of shaded colonnades, greenery, water and variations of large and small courts, and those spaces will be adjacent to airconditioned spaces so they will be comfortable for pleasant strolls.
